

DIRECTIONAL VALVES

CV10-23 Check Valve

DESCRIPTION

A screw-in, cartridge-style, hydraulic check valve for use as a blocking or load-holding device.

OPERATION

The **CV10-23** allows flow passage from ② to ①, while blocking flow from ① to ②.

The cartridge has a fully guided check which is spring-biased closed until sufficient pressure is applied at ② to open to ①.

FEATURES

- Low check mass for anti-cavitation applications.
- Hardened seat for long life and low leakage.
- Optional bias springs for back-pressure application flexibility.
- Industry common cavity.
